

Site Plan

1. Sketch the outdoor site plan of your home.
2. Identify the location of your gas meter and/or electric meter.
3. Identify the location of your water shut-off valve and water meter.
4. Identify the location of power lines, gas lines & water lines supplying your house.
5. In the second graph section, sketch the floor plan of your home where interior water shut-off valves are located as well as the location of your circuit breaker box.
