

Water Storage Barrels

You can use poly barrels for emergency water storage. These can normally be found in:

- 55 Gallon Barrels
- 40 Gallon Barrels
- 30 Gallon Barrels

You can also use these barrels for a number of things besides emergency water supply storage. Use them as rain barrels, store a variety of dry goods in them, or as your family's 72 Hour Emergency Kit container. We recommend that you stash your emergency water barrels in the bushes outside your house so that you can access them easily following a major disaster such as an earthquake.
