

# Mother's Day Bouquet of Photo Flowers

Looking for a bouquet of flowers for Mom that will never die? Make this precious keepsake for Mom or Grandma this Mother's Day and I guarantee you that they will cherish it!

## You Need:

- Construction paper, various colors
- Glue stick
- Photos
- Scissors and Tape
- Green chenille stems, one for each flower
- Optional: Patterned paper

## How to make it:

- Cut photos into circles to be used as the center of the flower.
- Cut simple flower shapes out of construction paper.
- Glue photo circle to the center of flower.
- This step is optional: Glue construction paper flower to a piece of patterned paper. Cut around the flower giving your construction paper about a 1/2 inch border of patterned paper.
- Tape chenille stem to the back of your flower. Make sure the tape is secure by pressing onto the tape with your fingernail.
- Trim ends of chenille to the length you desire, depending on what you are using as a vase. If making a hand-held bouquet, don't trim the chenille; simply tie a ribbon bow around them all.
